Exploring Complex Material Flows Symposium on Rheology

“Panta Rei” is a concept that dates back ages indicating that if you wait long enough, everything flows! The study of that flow, its nature, and the description of that movement is Rheology. As the study of flow is not limited to specific materials but spans an entire spectrum, it also covers different disciplines of knowledge: from Civil Engineering to Chemical Engineering to Biological Sciences. Thus, this symposium explores the complex material flows, featuring a distinguished roster of speakers from both academia and industry. The symposium would encompass insightful talks, interactive poster presentations, and a demonstration of the cutting-edge rheometer.

Don't miss this chance to deepen your understanding of rheology, connect with field experts, and unlock the secrets of material behavior!!!

SPEAKERS

Prof. Abhijit P. Deshpande
IIT Madras

Dr. Athira P K
Anton Paar

Prof. Murali Krishnan J
IIT Madras

Dr. Rahul A V
IIT Tirupati

Dr. Sayantan Majumdar
RRI Bengaluru
